Profile

Senior Freelance Frontend Developer with 10+ years of experience

building large-scale web applications and digital platforms for enterprise, public-sector, and agency clients.

Specialized in React, Next.js, Vue, TypeScript, frontend architecture, accessibility, and performance optimization.

Core Competencies

Frontend Architecture – Scalable component-based systems | SSR & SSG | State management | API integration (REST & GraphQL) | CMS & Digital Experience Platforms (AEM, CoreMedia, Liferay, Pimcore, Directus, Payload CMS)

UI Engineering – Responsive design | Design systems | Accessibility (WCAG/ARIA) | Motion & interactive interfaces

Quality & Performance – Testing | CI/CD | Core Web Vitals optimization | Technical SEO | WebSocket | Code reviews

Collaboration – Agile/Scrum | Jira | Azure DevOps | Confluence | Figma | Cross-functional teamwork

Tech Stack

TypeScript | JavaScript (ES6+)

React | Next.js | Vue | Nuxt

Redux | Pinia | TanStack Query

Tailwind | MUI | shadcn/ui | Ant Design | Styled Components

Jest | React Testing Library | Vitest

React Hook Form | Zod

Three.js | Framer Motion

Vite | Git | Docker | Jenkins | CI/CD

REST | GraphQL | WebSocket

Selected Projects & Clients

DB Info 4.0 Pia – Built and maintained a cross-platform information system using Vue, TypeScript, and Pimcore CMS, enabling Deutsche Bahn service staff to manage train connections and real-time passenger communication across desktop, mobile, customer displays, and dedicated hardware terminals.

Scholz & Volkmer GmbH | Mar 2024 – Feb 2026

SensEm – Developed a citizen science platform using Nuxt and Directus CMS, enabling the collection, visualization, and analysis of air quality data in public spaces as part of a BMBF-funded research initiative.

Scholz & Volkmer GmbH | Jun 2025 – Sep 2025

Privatmolkerei Bechtel – Delivered a React, TypeScript, and TanStack Query-based management platform for monitoring production equipment and scheduling maintenance activities within a large-

scale dairy manufacturing environment.

Das Büro am Draht GmbH | Jul 2022 – Nov 2022

Bundeswehr – Implemented modular React components and scalable template structures within a CoreMedia CMS environment for the Bundeswehr public information platform.

Aperto AG - IBM iX | Apr 2019 – Nov 2019

BMW – Built scalable React frontend components and AEM templates for BMW's corporate platform. Led frontend architecture for the BMW M community platform on Liferay, delivering reusable portal components in close collaboration with design and backend teams.

Hi-ReS! Berlin GmbH | Mar 2016 – Jun 2017

Mercedes-Benz – Implemented natural feature tracking and frontend functionality for an augmented reality web application showcasing the Mercedes-Benz AMG Series at an interactive exhibition.

17 GRAD | Jul 2015 – Sep 2015

Sharaf – Developed a Shopware-based e-commerce platform for a leading electronics retailer.

SOWHAT! GmbH | Apr 2015 – May 2015

Audi – Frontend Lead for the Audi A3 Sportback mobile web launch experience. Also contributed to the award-winning Audi Augmented Reality Calendar, a web-based AR experience recognized with Cannes Lions Bronze, ADC Deutschland, and DMMA Onlinestar awards.

Razorfish GmbH - SapientRazorfish | Nov 2010 – Sep 2014

Hyundai – Developed interactive web applications supporting Hyundai marketing campaigns, including Asphalt 7 Training and Guess Santa's Song.

Razorfish GmbH - SapientRazorfish | Nov 2010 – Sep 2014

McDonald's – Developed modular UI components and template systems within Adobe Experience Manager (AEM) for McDonald's digital platform, contributed to the McDonald's Germany iOS application, and led frontend development for national digital campaigns including Do-Your-Own-Coupons, Mexify Yourself, and Blend-in-Cup.

Razorfish GmbH - SapientRazorfish | Nov 2010 – Sep 2014

Unilever – Contributed to the development of an interactive digital campaign experience for Unilever's Fragrant Flowers initiative.

Neue Digitale GmbH | Jun 2010 – Nov 2010
